Student Learning Outcomes

Student Learning Outcome: What a student should know, be able to do, and value as a result of having completed a course.

Example Domains of Learning: Knowledge, comprehension, application, analysis, synthesis, evaluation, attitudes, psychomotor

Related Initiatives: QEP Critical Thinking Initiative; Assessment of General Education (see Attachment A: General Education Curriculum Map); Compliance with SACS Core Requirement 2.7.3; SACS Comprehensive Standards 3.3.1.1 and 3.5.1

Next steps:
1. Develop an agreed-upon schedule for general education assessment. [Critical Thinking is a component of general education.]
2. Refine student learning outcomes on general education master syllabi.
3. Align student learning outcomes on master syllabi with general education competencies identified on General Education Curriculum Map.
4. Refine and enhance assessment methods used to measure student attainment of learning outcomes aligned with general education competencies.
5. Develop mechanism for faculty to (a) document student attainment of learning outcomes associated with general education competencies and (b) record action plans for improving instruction and student learning.
